PRESIDENT'S ACTION DEPRESSES MARKET

Anti-Merger Instructions Have Marked Effect.

DECLINES ALL ALONG THE LINE

In a Number of Active Railway Stocks the Drop Was as Great as Three Points-Wall Street Was Taken Completely by Surprise.

NEW YORK, Feb. 20 .- The Stock Mar ket opened extremely active, and showing declines which extended to upward of three points in a number of the active railway stocks.

The disturbing influence was the infor mation from Washington that the President had directed the Attorney General of the United States to bring suit against the organization of the Northern Securities Company.

This intelligence took the Wall Street community entirely by surprise, and the more so inasmuch as it had been com-monly expected that on Monday next the Supreme Court would render its decision in the case against the Northern Securities Company now before it.

That the Executive should have acted on his own initiative in the meantime is a matter of general comment.

Stocks Severely Depressed.

The stocks most severely depressed in consequence of this news were St. Paul, Union Pacific, Southern Pacific, Missouri Pacific, Atchison, Reading, and the Erie

Among the miscellaneous and industrial stocks, very sharp declines were noted in Tennessee Coal and Iron and United States Steel, while Amalgamated Copper

was unlaworably affected by the same in-fluence that was effective in the local dealings, and a number of declines, ex-tending to over 1 point, were noted there. While there were naturally some recov-eries from the extreme depression of the initial dealings, the tone of the trading president of the Institute of Civil Engiremained exceedingly feverish and unset-tled.

Dominated by Washington.

LOWLANDS BAD FOR AMERICANS

Miners in the Mountains Not Affected by the Climate, However-Change Desirable After Two or Three Years' Residence.

Health conditions in the Philippines were again this morning the subject of the testimony of Governor Taft, before the Senate Committee on the Philippines. He again called attention to the fact that Americans and Europeans could not exercise with impunity in the tropical sun. They could not engage in agriculture or similar outdoor pursuits in the lowlands. On the plateaus and elevated districts, however, American miners had been engaged in prospecting without suffering any climatic inconveniences.

The General Health Good. Mr. Carmack asked a number of quesions as to the health of American women and children in the islands, and the Governor replied that it was generally good. The children seemed to thrive, but, he thought, it might not be desirable to keep them in the archipelago during the whole term of their minority. Adults always found it desirable to refresh themselves the course, H. G. Crickmore, today an- in a cooler climate after a residence of

Danger From Simple Ailments.

The principal danger to Americans and Europeans was from simple ailments, the neglect of which was likely to result in severe physical punishments. It was for this reason that the Commissioners had provided for free medical attendance among the civil employes.

Mr. Carmack read from a report that a percentage of deaths in the army in the United States in 1900 was 4.83, while in the Philippines it was 20.26. To this the Governor replied that it was during the continuance of guerrilla warfare, and in any campaign the percentage of death and discase would of course be much greater than when peaceful conditions ex-

Healthy Army Posts Needed. In the Chinese expedition there was a very high rate of death and disease, and as for Cuba, any medical officer would agree that it was a harder country to live in than the Philippines so far as health was concerned. The human heart, that most wonderful of engines, is scarcely larger than a man's fist. Yet in each twenty-four hours the dur! heart moves approximately six tons of blood, equivalent to about two barrels of blood per hour. And this continues without ceasing from the first breath of infancy to the last sigh of age. Is it any wonder that when continued extra strain is put upon so delicate and busy an or-gan, it should break down? Is it any wonder that in this age of overwork there should be an increasing number of deaths attributed to heart failure?

Dr. Pierce's Golden Medical Discovery cures diseases of the organs of digestion and nutrition and purifies and enriches the blood. One of the ingredients enter-ing into the "Discovery" is one of the best heart tonics known to medicine. Thus while through the action of "Golden Medical Discovery" the body is nourished into strength, the heart is also strengthened and an adequate blood supply is pumped to the stomach and kidneys thus improving the action of these organs.
